ABOUT OUR SCHOOL

INSURANCE TRAINING SCHOOL was created out of the desire and need for live “in-person” class instruction for insurance pre-licensing. Students will gain knowledge through live interaction with the Instructors and other students. Real life experiences used with classroom training, along with online sample tests, aid students in learning and retaining content they need to know to pass the state exams the first time. Unlike online classes, live in classroom teaching allow students to learn through group discussions and clarification on difficult subjects.

Students can repeat a class within a 3 month window of the original class date at a discounted rate.

If you are feeling ill please use the online feature or move your registration to a later class. Your class must be completed within a 3 month window from date of registration.

All courses include a study manual, the State Law manual and online practice testing.

WHAT WE OFFER

GET PREPARED

Our courses are designed to prepare students to be able to pass the required TN state licensing exam in both General Knowledge of Insurance and the State Laws for Life, Health, Property and Casualty Insurance.

WHAT TO EXPECT

Your studies will begin with classroom learning, taught by a seasoned instructor who will guide you through the Course Content Outline and give you firsthand, real-life experiences to make the material come alive. From there, students will have access to an online testing system for each of the course chapters to test their knowledge on the various topics. Then, the students can test their performance for the state licensing exam by taking a sample, timed test online to complete their training.

Our goal is to TRAIN you to the fullest to make you succeed in your new career.

Life & Health	\$350
Life or Health only.....	\$250
Property & Casualty	\$350

ABOUT OUR INSTRUCTORS

ITS Instructors have both teaching and tangible insurance experience. They have a combined 30+ years of experience in teaching pre-licensing for Life, Health, Property, Casualty, Adjuster and Continuing Education courses. In addition, they also have actively worked in the Insurance industry for a combined 55+ years.

Our Instructors have conducted both private and public classes in multiple states. They have taught for some of the largest insurance companies and call centers throughout America.

Real-life examples are used to help clarify insurance concepts to make learning effective and enjoyable. The ITS Instructors cover the topics the State requires an individual to be tested on.

Although the courses can be overwhelming at times, our Instructors make it fun and exciting. Each Instructor has their own unique style of teaching, however, many of the students find the live classroom classes interactive, thorough, and a great way to learn the material for the State exam.
